Generator Not Included

Clean accumulated debris from inside and outside the generator. To receive full value from the warranty, the operator must maintain the generator as instructed in this manual. Some adjustments will need to be made periodically to properly maintain your generator. All service and adjustments should be made at least once each season. Wash hands after handling. Liquids can enter engine fuel system, causing poor performance and/or failure to occur. Follow the requirements in the Maintenance Schedule chart above. NOTICE Once a year you should clean or replace the spark plug and replace the air filter. Keep the linkage, spring and other engine controls clean. See any authorized dealer for service. The generator's warranty does not cover items that have been subjected to operator abuse or negligence. Inspect cooling air slots and openings on generator. These openings must be kept clean and unobstructed. Engine parts should be kept clean to reduce the risk of overheating and ignition of accumulated debris. Use a damp cloth to wipe exterior surfaces clean. NOTICE Improper treatment of generator could damage it and shorten its life. DO NOT expose generator to excessive moisture, dust, dirt, or corrosive vapors. DO NOT insert any objects through cooling slots. Use a soft bristle brush to loosen caked on dirt or oil. Use a vacuum cleaner to pick up loose dirt and debris. Battery Maintenance Other than float charging, described elsewhere, no maintenance is required for the starting battery. Operate and store the unit in a clean dry environment where it will not be exposed to excessive dust, dirt, moisture, or any corrosive vapors. Liquid and dirt buildup on the generator internal windings will eventually decrease the insulation resistance of these windings. Cleaning Daily or before use, look around and underneath the generator for signs of oil or fuel leaks. In addition, if liquid enters generator through cooling air slots, some of the liquid will be retained in voids and cracks of the rotor and stator winding insulation. Keep the battery and terminals clean and dry. NOTICE Battery charging should be performed in a dry location, such as inside a garage. First 5 Hours • Change engine oil Every 8 Hours or Daily • Clean debris • Check engine oil level Every 25 Hours or Yearly • Clean engine air filter Every 50 Hours or Yearly • Change engine oil Yearly • Replace engine air filter • Service fuel valve • Service spark plug • Inspect muffler and spark arrester • Clean cooling system WARNING Battery posts, terminals and related accessories contain lead and lead compounds - chemicals known to the State of California to cause cancer and reproductive harm. Keep the area around and behind the muffler free from any combustible debris. A new spark plug and clean air filter assure proper fuel-air mixture and help your engine run better and last longer. Emissions Control Maintenance, replacement, or repair of the emissions control devices and systems may be performed by any non-road engine repair establishment or individual. However, to obtain "no charge" emissions control service, the work must be performed by a factory authorized dealer. See the Emissions Warranty. Generator Maintenance Generator maintenance consists of keeping the unit clean and dry. Cooling air slots in the generator must not become clogged with snow, leaves, or any other foreign material. NOTICE DO NOT use water or other liquids to clean generator. More frequent service is required when operating in adverse conditions noted below. 1. Service more often under dirty or dusty conditions. General Recommendations Regular maintenance will improve the performance and extend the life of the generator. Engine Engine Brand Briggs & Stratton Engine Model 2100 Series OHV Engine Displacement 420cc Starter Type Electric / recoil Fuel Tank Capacity 8.5 gallon Fuel Gauge Yes Warranty Warranty 2-Year Limited (Product) Consumer Use, 90 Day Limited (Product) Commercial Use Dimensions Dimensions L/W/H 20"(L) x 27.5"(W) x 25.5"(H) Weight (approx.) 151 lbs Specifications Wheels 10" Never Go Flat Running Watts 7000 Starting Watts 10500 Volts 120 / 240 Amps 58.3 / 29.1 Gross Torque 21.00 ft-lbs* Run Time at 1/2 Load 11 hours Low Oil Shutdown Yes Automatic Idle Control No 20 troybilt.com Maintenance Maintenance Schedule Follow the hourly or calendar intervals, whichever occurs first.
